EDUCATION

University of Maryland, College Park

College Park, Maryland

B.S. in Computer Science, Minor in General Business

May 2026

- **Concentrations:** Software Engineering & Cybersecurity
- **Related Coursework:** Object-Oriented Programming, Algorithms, Web Application Development with JavaScript, Computer and Network Security, Database Design, Data Science, Machine Learning, Programming Handheld Systems
- **Attended Amazon University event** – AWS GEN AI Workshop with UMD Codeblack, Colorstack, and BSE

EXPERIENCE

Maryland Air National Guard

Baltimore, Maryland

Enlisted Airman First Class (E-3 A1C), Reserve, Training Pending

May 2026 – Present

- Scheduled to begin Initial Entry Training (Basic Military Training and Technical Training for **Cyber Intelligence**)
- **Security clearance process initiated (May 2026)**
- Demonstrating discipline, teamwork, and ability to operate in structured environments

CVF-Solutions: <http://cvf-solutions.com/>

Washington, D.C.

Lead Web Developer & IT Support Specialist

August 2022 – Present

- Developed, managed and maintained the company website through **AWS EC2**, **GitHub Pages**, **Windows Subsystem for Linux**, and **VS Code** using **HTML**, **CSS**, and **JavaScript**, leveraging AI-assisted coding tools (**ChatGPT**, **GitHub Copilot**) to accelerate development and optimize code quality.
- Diagnosed and resolved technical issues across hardware, software, and networking systems for clients with over 50 users
- Collaborated with system administrators and employees to maintain, update and patch computer systems

CVF-Solutions: <http://cvf-solutions.com/>

Washington, D.C.

Web Developer & IT Support Intern

May 2022 – August 2022

- Developed the company website through **AWS EC2**, **GitHub Pages**, **Windows Subsystem for Linux**, and **VS Code** using **HTML**, **CSS**, and **JavaScript**, leveraging AI-assisted coding tools (**ChatGPT**, **GitHub Copilot**) to accelerate development and optimize code quality.
- Diagnosed and resolved technical issues across hardware, software, and networking systems for clients with over 50 users
- Collaborated with system administrators and employees to maintain, update and patch computer systems

PROJECTS

FocusBubbles Android App

College Park, Maryland

Team Member

March 2026 – May 2026

Technologies: **Kotlin/Java**, **Android Studio**, **Object Oriented Programming**

- Collaborated in a team of three to design and develop an Android application for task management and productivity using **Kotlin** and **Android Studio**
- Architected application functionality using the **MVC** design pattern with multiple views sharing and updating common data models
- Integrated **Firebase** backend services for **remote data persistence**, template sharing, and user ratings
- Implemented **Android Speech Recognition APIs** to support voice-based task creation and improve user workflow efficiency

Mr. Roboto's Credit Union Web Application ([Video Demo](#))

College Park, Maryland

Team Member

December 2024

Technologies: **HTML**, **CSS**, **JavaScript**, **Linux**, **JSON**, **Node.js**, **Express**, **MongoDB**, **RoboHash API**, **GitHub**

- Built a full-stack banking web application supporting deposits, withdrawals, and peer-to-peer transfers in a **Linux environment**
- Used **GitHub** for version control and documentation.
- Developed RESTful backend endpoints using **Node.js** and **Express** to handle account operations and data persistence
- Integrated the **RoboHash API** to dynamically generate unique user avatars
- Worked with **MongoDB** to store and manage user and transaction data

Predicting Crime: Uncovering Crime Patterns with Data Science

College Park, Maryland

Team Member

May 2025

Technologies: **Python, Jupyter Notebooks, Windows Subsystem for Linux**

- Analyzed 28,563 NYPD shooting incident records using **Python** to identify geographic and demographic crime patterns
- Applied **exploratory data analysis**, **Chi-squared hypothesis testing ($p = 0.05$)**, and **K-Means clustering** with visualizations including **KDE plots** in **Jupyter Notebooks**
- Authored project documentation by defining research questions, summarizing team contributions, and presenting data-driven insights in a **collaborative team setting**

Over Terrain Vehicle (OTV) Navigation

College Park, Maryland

Team Member

May 2025

Technologies: **C++, Arduino, Embedded Systems, Sensors**

- Developed control logic in **C++** for an OTV to navigate a course using sensor input and real-time decision making
- Implemented movement, steering, and obstacle-avoidance behaviors based on environmental data
- Integrated hardware components including motors and ultrasonic, color, and water depth sensors with software running on an Arduino Mega microcontroller
- Tested and debugged system behavior through iterative trials, refining control algorithms for accuracy and reliability

Buffer Overflow Exploit Development

College Park, Maryland

Individual Project

September 2024 – December 2024

Technologies: **C, Visual Studio Code, Windows Subsystem for Linux, Docker, GDB, Bash, Gitlab**

- Developed a working buffer overflow exploit against a vulnerable C program running in a **containerized Linux environment**
- Used **Gitlab** for version control and **Docker** to replicate a controlled testing environment and debugged exploits using GDB and container tools
- Analyzed stack memory layout and bypassed protections such as Address Space Layout Randomization (ASLR)
- Demonstrated understanding of **Linux process management** and **command-line workflows**

Tube Videos Manager

College Park, Maryland

Individual Project

February 2023

Technologies: **Java, Eclipse, Object Oriented Programming, Windows Subsystem for Linux**

- Built a **Java**-based video management system using **object-oriented programming** and interface-driven design
- Developed **classes** and **manager methods** to handle videos and playlists with **dynamic ArrayList data structures**
- Implemented and tested the application in a **Linux (WSL)** environment using VS Code

Auction Database System

College Park, Maryland

Individual Project

October 2025

Technologies: **Relational Database, SQL (MySQL)**

- Designed and implemented a **relational database** schema for an auction platform using **MySQL**
- Modeled **entities** and **relationships** across ITEM, PERSON, and BID tables with normalized design
- Implemented **primary keys**, **composite keys**, and **foreign key** constraints with **cascading updates/deletes**
- Developed SQL queries for data manipulation and retrieval, including **joins** and **aggregations**
- Validated data integrity through constraint testing and edge-case analysis

SKILLS

Programming: Java, C, C++, Kotlin, Python, JavaScript, HTML/CSS, Rust, SQL, PHP, Pandas, MATLAB

Tools: WSL (Linux), Eclipse, Visual Studio Code, GitHub, Gitlab, MongoDB, Jupyter Notebooks
